Statistics

Statistics

The heart of our product: **over one million statistics** from four databases: German, English, French and Spanish.*

Data on 80,000 topics and 170 industries from 22,500 sources.

Our **Premium Statistics** (approx. 93% of all statistic), are available exclusively to Premium, Corporate and Enterprise Account users.

Available to **download in XLS, PNG, PPT and PDF** format.

Forecasts & surveys

With our 5-year market forecasts our experts offer you relevant data on market trends of about 400 industries in around 40 countries.

Based on historic data and a detailed market model the future market size is calculated.

Exclusive surveys among consumers and experts

Statista's Consumer and Business Insights team conducts exclusive quantitative online and telephone surveys. The collected primary data is published in the form of statistics and as parts of studies and dossiers.

Infographics

Our infographics **visualize hot topics and issues**. Every day our data journalists publish several graphics about different topics such as Media, Society, Politics, Economy or Technology.

For more information, please visit <https://www.statista.com/chartoftheday/>.

Topic pages

With our topic pages we provide you with an **initial comprehensive overview of all content** that we offer on a certain topic.

Along with a short synopsis, these pages link to relevant dossiers and forecasts as well as the latest and most popular statistics on the topic on the chosen topic.

The components of the Campus License

Studies & reports

Dossiers

All relevant statistics on a certain topic in one document.

Dossiers focus on topics that our users access particularly often. They help you quickly and thoroughly familiarize yourself with a new topic.

All dossiers incl. detailed references are available to **download in PowerPoint and PDF** format.

They are regularly updated by research experts and new statistics are continually added.

Statista studies

Outlook reports provide background information, trends, and forecasts for the future development of several digital and consumer goods markets.

Surveys include the complete primary data tables of exclusive consumer and expert surveys conducted by Statista's Consumer and Business Insights team in Excel format.

Toplists include all top companies in a given industry or region based on revenue. They provide contact information and the most important corporate key figures.

Industry & country reports

Industry reports consolidate the most important information on industries, presenting important and insightful data about the status quo and the trends of the industry including forecasts up to 2021 including high-quality diagrams and tables which give a quick overview of the industry's current situation.

Country reports give insights into the major country trends in order to assess the risks and opportunities relevant for international business. They cover economic conditions, public finances, labor force, consumption, social development, etc., and include statistics, forecasts, survey results and analyses.

External studies

32,000 external studies, which provide a detailed insight into the general context of a specific topic.

These include studies from market researchers, organizations, companies and public institutions across more than 170 industry sectors.

Expert tools

Digital Market Outlook (DMO)

Regularly updated **5-year forecasts on revenue, users and relevant market indicators for 8 digital core markets** covering over 50 countries and regions.

In total, the tool covers 92 segments and offers **30,000 interactive statistics**, which are available to download in PDF and Excel format.

All **comparable key figures** are based on extensive analyses of relevant indicators from the areas of society, economy, and technology.

Consumer Market Outlook (CMO)

Portrays the **18 major consumer goods markets (including passenger cars) worldwide** and more than 200 product categories.

It provides historic data and **4-year forecasts on the most relevant KPIs of each market** including market value and market size.

The forecasts are modeled using industry-specific data as well as general indicators like gross domestic product and import/export volumes of goods.

Company & sources databases

The international **company database** includes 5,500 companies and provides information about a given company's headquarters, revenue, growth and employee numbers.

Statista's **sources database** contains background information on all 22,500 sources. Includes all market research institutes, organizations, companies and governmental institutions that act as the basis of the Statista portal.

Publication Finder

The Publication Finder lets users **swiftly discover publications** on their research topic by letting them **search over 1 million studies, reports and other documents** in German or English.

All search results can be filtered by, for instance, date of publication, number of pages, industry or document type.

Digital Market Outlook (DMO)

Identify market potentials of the digital future
